SUMMARY

Product Manager with 5 years across AI, EV charging, and industrial products, currently building AI native products at Shell. I work from user discovery to shipped outcomes: product strategy, roadmap ownership, PRD writing, and cross-functional delivery with engineering and market operations, with success metrics agreed up front. Recent: an alerts redesign now default in every Shell EV market, and an agent platform that cut a 6 week cycle to 1 week.

SKILLS

Product: Product Strategy, Roadmapping, Product Discovery, User Research, PRD Writing, Sprint Planning, Stakeholder Management, JTBD, RICE Prioritization, Go-to-Market, Competitive Benchmarking, Agile
AI: AI Agents, RAG, Model Evaluation, MCP, Prompt Engineering, Claude Code, Spec-Driven Development
Technical: Python, SQL, REST APIs, Power BI, Databricks, Figma, JIRA, Azure DevOps

WORK EXPERIENCE

Shell | Shell Graduate Program Bengaluru May 2024 - Present

Product Management, Subsurface & Wells Architecture — *AI agents for subsurface software* Dec 2025 - Present

- Ran discovery on Shell's 22 legacy Petrel plugins via developer shadowing and product owner interviews, then scoped an adapter pattern isolating SDK calls so each annual deprecation release changes one layer, not the whole plugin.
- Cut plugin SDK maintenance from 6 weeks to about 1 week per plugin with a two-agent harness of tools, skills, test playbook, and acceptance criteria; scoped agents to structural changes only and staged the pilot across plugin types to win skeptical stakeholders; 5-plugin pilot approved.
- Owned discovery to MVP for replacing the end-of-life Java data broker behind Petrel's well and seismic data, covering user pain points, architecture calls, business case, and a web app plus Petrel plugin.
- Removed vendor dependency and added OSDU and Databricks connectors for cloud migration; plugin in testing, funded in Q4 PI planning for Q2 2027.

Product Management, E-Mobility — *EVEC, Shell's global EV charger operations platform* May 2024 - Dec 2025

- Shipped Alert Grouping and Prioritization, scoped from operator interviews, cutting alert volume 80% to about 25 per page; now the default alerts experience in every Shell EV market.
- Onboarded Switzerland and Singapore from kickoff to live operations in 2025 through demos, requirements gathering, production RCAs, and feature rollout.
- Ran discovery with 15+ market operators and benchmarked 3 competing products, delivering 5+ features and 10+ roadmap items for 2025.
- Acted as EVEC's product manager on sprint planning, roadmap, and stakeholder management; validated the Autoheal case that cut recurring fault resolution from 900 to 36 minutes.

Eaton | Project Manager & NPD Engineer Pune Aug 2018 - Sep 2021

New Product Development — *electrical switchgear portfolio*

- Launched 2 products with \$4M projected revenue, pitching and leading Agile delivery of two North America new product introductions as project manager.
- Directed a 5-member cross-functional team through market research and competitive benchmarking to identify 10 customer-critical features for a new overhead switch line.
- Cut prototyping and validation turnaround 30% using Lean Six Sigma and simulation-first approaches; co-developed go-to-market strategy with product owners.
- Co-invented bypass switching technology (US patent US20210143728A1); 2 E-Star awards for on time launch and patent contribution.

PROJECTS

- **BLR Neighborhood Explorer** ([live product](#)): consumer web product scoring 100+ Bengaluru neighborhoods on rent, livability, and commute, on a nightly pipeline across 4+ live data sources.
- **What's Trending Bangalore** ([live demo](#)): map-first community discovery product with a recency-weighted trending score (14-day decay), Reddit and YouTube ingestion, and a moderation queue.

EDUCATION

MBA | SBM, NMIMS Mumbai | CGPA 3.21 / 4 2022 - 2024

B.Tech, Mechanical Engineering | Walchand College of Engineering, Sangli | CGPA 8.12 / 10 2014 - 2018

AWARDS & LEADERSHIP

- Shell Special Recognition Award for EVEC product delivery, 2025.
- Core member, Shell Inclusion Accelerator and Shell LGBTQIA+ Network, contributing to accessibility and DE&I programming, 2024 - present.
- Student Placement Coordinator, NMIMS, 2023: led a 90+ member team placing 1,500+ students with 100 recruiters.
- Runner up, Microsoft PM Engage case competition, 2022; awarded a pre-placement interview with Microsoft.
